

Tina from NJ

"I purchased *The Energy Guardian™* (kit) to see if I would save on my heating and cooling bills. Boy did I ever! I had someone install it last year and I could feel the difference as soon as I closed the lid. **I am also happy that *The Energy Guardian™* (kit) is light weight. As a single mother, it is easy to handle getting in and out of the attic."**

Daniel from PA

I learned of *The Energy Guardian™* pull-down cover in the newspaper. I knew that it was very drafty below my pull-down ladder and I wanted to save energy. Therefore, I visited your website to learn more about it. I had it installed and the savings are dramatic! **I have saved over \$100 per month! I would recommend this product to anyone!**

Dave from NH

"I got *The Energy Guardian™* kit for pull down ladders. We noticed a difference in the room where the pull down stairs are located as soon as it was installed. Just in time too, because we had the coldest night of the month that night. **My wife now feels that the heating system works better than ever."**

Natalie from PA

"I have *The Energy Guardian™* (cover) over my stairway to the attic. This is my 4th year in this house. **Compared to the four summers prior, there is now a huge difference! I can set the thermostat much higher and it is even more comfortable. It does everything it is supposed to do and more."**

Professional Installation Makes It Easy

- Assembly of *The Energy Guardian™* Kit
- Site preparation and product adaptation as needed
- Three step process of sealing air leaks in the entry way
- Inspection of entire attic for improperly installed insulation

The Energy Guardian™ Kits are the complete solution.

- Reduce your heating costs
- Save on the cost to cool your home
- Make your home more comfortable
- Eliminate a major cause of ice damming
- Lightweight, durable and easy to use
- Fits any type of attic entrance
- Proven results that last for years
- Installed by appointment
- Making a difference in homes nationwide

Worried about the High Cost of Fuel?

Fight Back with *The Energy Guardian™* Kit!

It's easy to understand:

ENERGY STAR®, the U.S. Department of Energy, and other industry experts agree that the **attic is the number one** cause of energy loss in homes today. The largest cause of energy loss in attics is the entryway. It can be a push up panel, pull down ladder, knee wall door/ panel, or stairway. Whichever one you have, it is like having an open window every day of the year.

It's a year round problem:

You pay to heat the attic in the winter and cool it in the summer.

During the winter months, hot air rises in the home and flows into the attic through the entrance. It is known as the "stack effect." The air leaks cause uncomfortable drafts. In addition, this warm air melts the snow on the roof. The melted snow flows down to the rain gutters and then freezes, causing ice damming. In summer, super hot air builds up in the attic even in those with venting and roof fans. This super hot air moves into the living area, even faster when a fan or air conditioner is turned on. Finally the dust and the harmful debris flow freely into your home.

The Complete Solution:

There are several essential components to a complete, reliable solution so that you reduce both your heating and air conditioning bills.

The Energy Guardian Kits provide them all:

1. **Tight Air Seal**- Proven with blower door and smoke stick tests, the draft causing air leaks are sealed tight.
2. **High Insulating Value**- R- 30 rating for all except knee wall which is R-24.
3. **Durable product** – All kits are made for frequent use and come with a 20 year warranty.
4. **Lightweight & easy to use**- The heaviest component of any unit is only 10 lbs. Each kit has handles and is made with easy to open and return features.
5. **A Product for any attic entrance**- Individual kits are made for Pull Down Ladders, Stairways, Push-up Panels and Knee-wall Doors.
6. **Proven**- Awarded for Environmental Excellence, endorsed by industry experts and featured in Radio and TV Consumer Advocacy Reports, these units also receive accolades across the country from our most important and valued source- homeowners like you.

Industry experts agree:

"Over the past 25 years, I have worked in several important areas regarding residential energy conservation. I have frequently been a featured speaker at national conferences on the subject of energy conservation products, procedures, and methodologies... I have reviewed or used virtually every energy saving product and procedure available. It is my professional opinion that there has never been a product to properly insulate and seal these attic accesses until *The Energy Guardian™ Covers*. **Your product should be used as a national standard.**" - *Vic Alshire - President, Comfort Company*

"I am always on the lookout for innovative energy solutions that save energy or improve the comfort for homeowners. *The Energy Guardian™ Access Covers* are a home run as they do both. I have been in the heating and air-conditioning business for 27 years and there is nothing to compare with your products." *Rocco Pace - President, Oliver Heating & Cooling, VP DV Air Conditioning Contractors of America.*

"As a builder for 30 years, I am confident that I have come across almost every problem imaginable in a home and all types of solutions to those homes. **In all of these years, I have never seen a more practical or effective solution than *The Energy Guardian™ Attic Access Covers*.**

When I close the lid into the frame, I can hear and feel the air seal established." *Art McKeown - President, AEM Custom Builders Inc. & Past President C/DC Home Builders Assn.*

So do our Clients:

John from FL

"*The Energy Guardian™ push up hatch* was installed this spring. Our home was cooler and less humid on the first hot spell of the year and stayed that way all summer. I am saving at least \$100 per month on my electric bill and it is hotter than last summer. **My home is more comfortable and the product paid for itself in the first summer. Now that's a good deal!**"

Lisa from PA

"Last year I had more insulation installed in my attic. It helped a little, but it didn't fix the problem. It was still colder and drafty on the second floor all winter and much warmer in the summer.

This fall I had *The Energy Guardian (Kit)* installed when we had our first cold spell. The results were amazing! **Within 2 hours, I turned down the thermostat by 8 degrees and my home was more comfortable and the drafts are gone. I had no idea that my attic entrance was such a big problem, but it absolutely was.**"

Antoinette from PA

I am in the heating and cooling business, so I can't be fooled by any gimmick products. I had *The Energy Guardian™ Kit* installed a year ago. It made an immediate change in our entire 2nd floor. The drafts and cold were gone within minutes. It is much cooler in the summer too. **I have saved over \$300 on my heating and cooling bills in one year."**

Bill from RI

I ordered *The Energy Guardian™ Attic Cover*, and have been thrilled with the results. The savings and comfort it has brought us are remarkable. **The results are unbelievable in both the winter and the summer. It is the best invention that I've ever seen. (ESS Energy Products, Inc.) deserves a medal for coming up with this product."**
